BMP Automotive #15

TITLE: RECYCLING OF OILY SCRAP METAL PARTS

Regulatory Citation: 6 NYCRR Part 371.1(g)

Applicability: Scrap metal parts that exhibit oil.

Purpose: Ensure the proper recycling and storage of scrap metal parts that exhibit oil.

Person or

Department Responsible: Automotive Department Chairman (629-7272)

Schedule: As needed.

Procedures: Any scrap metal or engine parts that exhibit oil, such as engine parts, drive shafts, etc. must be stored in the trailers located outside the Automotive building and purchased for that purpose. Alternatively, the oily scrap metal can be stored in containers indoors, or engine parts kept inside the labs, away from rainwater and periodically checked for spillage.

The Automotive Technician will make arrangements for the recycling of the oily scrap metal when the outdoor scrap metal dumpster is picked up.

Record keeping:

Record Location:

Current vendor: Freedman's, Green Island, NY

Contact: Automotive Technician (629-7190)
Director of Environmental Health and Safety (629-7163)
