Revised 4/2004 P Watt  
Prepared By Carla McGreevy

**BMP** MFT #12

**TITLE:** WAY OIL & COOLANT MIX DISPOSAL

**Regulatory Citation:** 6 NYCRR Part 360-14 and 374-2

**Applicability:** Way oil and coolant present in some lathes or milling machines

**Purpose:** Proper collection and disposal of coolant-way oil mix.

**Person or**

**Department Responsible:** MFT Department Laboratory Technician

**Schedule:** very infrequent (once per 3 – 5 years)

**Procedures:** When coolants-way oil mix is removed from any MFT machines, the MFT Lab Technician will place the coolant way oil mix into the 55 gallon drum labeled, "Waste Coolant" The container will be kept closed except when adding waste coolant. When the drum is 80% full or at the end of the spring semester, the Lab Technician will contact the Coordinator of Environmental Health & Safety for proper disposal.

The Coordinator of EHS will arrange for disposal/recycling of the material with the approved vendor. The waste receipt will be signed by the MFT Lab Technician and a copy forwarded to the Coordinator of EHS.

**Record keeping:** Waste receipt.

**Record Location:** Original Physical Plant office. Copy MFT Department

**Current vendor:** Advanced Liquids, Inc, Meriden, Connecticut

**Contact:** MFT Department Technician (629-7377)  
Coordinator of Environmental, Health and Safety (629-7163)
